This review is from: Naked Spirit: The Supernatural Odyssey (Paperback)

A Journey that presents the Assemblage Point (AP) as the human being spiritual heart sprinkled with fascinating

Explorations on Electromagnetic life with its body atomic and quantum energy field. Dr Whale's discussion on the "Supernatural" force as matter, that supposedly allows the universe to evolve due to larger consciousness, its relationship with quantum mechanics, and the famous power of intent, are embedded in a revolutionary concept of quantum consciousness and its relationship with the human energy field. This approach makes us reflect upon Whale's ability to embrace spirituality, physics, and psychology, with a flowing presence.

In this book, personality traits are creatively explored allowing for connections with health and healing, out of body experiences and after life explorations. The astonishing expanded work and research on the Assemblage Point and the cases presented makes this material invaluable.

Dr Whale not only has been able to amalgam and reflect on diverse and complicated topics and areas, but also has shared his recount of personal experiences and some of the ones of people using his AP technique. As Toltec Shamanism practitioner, Assemblage Point locator, and Shifter, I am greatly inspired at his great capacity to go deeper and deeper in his take on the Assemblage Point work. In his first book, "The Catalyst of Power: The Assemblage Point of Man", he introduced us, step by step, to his research and work with the AP, as well presented, for the first time, his famous map to locate the AP. Here in his second book, his odyssey takes him to reflect on matter as supernatural force allowing new venues to discuss the connection mind-matter-illness.

Dr Whale, a master on Assemblage Point Research and Shifting, has branched out to integrate his knowledge with other disciplines, validating the importance of a comprehensive, integrative, and holistic point of view in research and practice.

I had the pleasure and honor, both to meet Dr Whale personally several times, and I may have to say until today I am deeply impressed by his extraordinary ability to grasp reality from an integral perspective, his eloquent manner of sharing information as well as his unconditional love and compromise to his research and his truth. He is a real giver and has the gift of a quick mind and commitment to offer his best to humanity. He has already created one of the most powerful tools for research and assessment: the Assemblage Point Map.

Dr Whale's research on the Assemblage Point has been influential and priceless in my personal and professional practice. For seven years I have been using his famous "off centre" symptomatic map of the Assemblage Point (Figure 6.4, page 124) with clients to locate health challenges. In doing so I have had the opportunity to help my clients go to their heart center and to, fearless and secured, enter the path for change, transformation, and healing, as Dr Whale did with me.

Dr Whale "shifted" me seven years ago. At that time I had been "shifted" by other practitioners before, however I had never had experienced this sense of entering a space of "not doing, not pity, and emptiness" that I respired with his work. He helped me enter a new consciousness with the absolute safeness of knowing it was the perfect place. I am very grateful to him for his gift to me.

Yes, this book is about the truth of a scientist, a quick thinker, and a brilliant mind that fulfills his life purpose as healer, creator, and giver by going out of his way to offer humanity this gift of love and health.
